

ENSURE DATA RECOVERABILITY

Recover your data from loss or corruption with a robust business continuity and disaster recovery (BCDR) strategy.

Beat Data Loss With BCDR

The cost of downtime is high. Data loss can potentially cripple your business. The likelihood of your business losing data is even greater if your data is spread across multiple geographies, remote workers and devices, SaaS applications and the like.

In order to prepare your business to survive data loss and minimise downtime, you need a solution that will always secure your data and create a backup.

To ensure your business doesn't miss a beat in the face of a crisis, a BCDR solution can keep your organisation running and restore your data in the shortest amount of time possible.

Without a BCDR plan, how much downtime can your business withstand?

Why You Might Need to Recover Your Data

- Human error and hardware failure are top causes for data loss.
- 82% of analysed breaches over the past year involved a human element.^[1]
- In 2021, ransomware breaches rose by 13%, a greater rise than we saw over the past five years combined.^[2]
- 62% of system intrusion incidents were caused by supply chain breaches in the past year.^[3]

RECOVERY ASSURANCE

Get the highest level of automatic recovery testing with detailed analytics and reporting. Testing is performed on applications or in the cloud with zero impact or interruption to normal operations or the need for staff involvement.

SELF-HEALING BACKUPS

Remediate backup-related issues that are frequently encountered or can cause a malfunction using intelligent SaaS remediation tools.

MAINTAIN COMPLIANCE

Prove your commitment to data protection and regulatory compliance requirements with robust on-demand reporting, automatic recovery testing and end-to-end encryption.

FLEXIBILITY TO CUSTOMISE

Customise at a granular level to achieve all recovery time objectives (RTOs), recovery point objectives (RPOs) and any retention or system criticality requirements like advanced networking recovery.

DON'T LET DOWNTIME BE YOUR DOWNFALL! TALK TO US TODAY ABOUT A BCDR SOLUTION FOR YOUR BUSINESS.
